

Coding to Concept™

Level-1 Index

Professional (Grade 9 onwards)

Session 1

Sequencing, instructions, data types

Introduction to python

Learn about different data types in python

Session 3

Flow control, For loop, Nested If/While loop

Flow control in python

Learn about flow control statements in python

Session 5

GUI, conversion factors, loops, Events

Currency exchange

Game building 1 – Using currency exchange concept

Session 7

Game components, GUI, conditional statements

Rock, paper & scissor game

Game building 2 with variations

Session 9

Cloud database, AI techniques, Training machine, Object detection

AI & ML in daily life

Learn about basics of AI & ML

Session 11

Voice, text, speech tagging, speech control

AI based speech recognition

App building 5 – Speech recognition using AI

Session 2

Operators, syntax, input processing

Calculator

Learn about different operators and it's types in python

Session 4

Mathematical formulas, I/O Processing

Temperature conversion

App building 1 – to convert temperature in different unit system

Session 6

List/tuples, input processing, loops

Story telling in python

App building 2 – Create your own story using python

Session 8

Operators, math functions, tk library

Python and Mathematics

App building 3 – To calculate addition of two matrices

Session 10

Loops, cloud data, information gathering

AI based text recognition

App building 4 – To recognize text using cloud data

Session 12

Object identification, image processing, object sorting

Projects on Artificial intelligence

Projects based on AI and ML technology

Session

CODING CONCEPT
OUTCOME
